DETAILED ACTION

Applicants' arguments, filed 4/17/2008, have been fully considered. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Claim Rejections - 35 USC § 103

Claims 1-7 were rejected under 35 U.S.C. 103(a) as being unpatentable over Brendel et al (US 6,531,495, '495, filed Oct 30, 2000, granted 3/11/2003), in view of Smith et al (US Pregrant Pub 2002/0161018).

This rejection is maintained.

Examiner showed '495 teaches in claims 1 and 15 the composition which reads on the elected specie and an effective amount of an IKr channel blocker (see claim 15). '495 does not teach ibutilide as the specific IKr channel blocker or administration sequences. Smith et al teaches the IKr channel blocker, Ibutilide. At paragraph 25, teaches "ibutilide ... may enhance the potency of local anesthetics by blocking the IKr channel," thereby placing ibutilide in the category of IKr channel blockers.

Therefore, one of ordinary skill in the art would recognize that when making a composition according to '495, it would be obvious to use a known IKr channel blocker, such as taught in Smith et al where an IKr channel blocker is called for. Additionally, any sequencing of the composition administration is obvious where claim 7 is directed to all possible sequences, i.e. simultaneous, separate, and sequential.

Applicants respond by suggesting super-additive results make the combination unobvious.

While Examiner agrees there is sufficient evidence supporting synergism of compound Example 1 with ibutilide and dofetilide, that evidence is not commensurate to the scope of the claims. See MPEP 716.02(d). Here, only one compound of the formula from claim 1 was demonstrated in combination with only two possible IKr channel blockers. Without further evidence showing the class of compounds follows the same trend, the showing provided by applicant cannot be deemed commensurate in scope with claims as currently drafted.

Conclusion

No claims allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
